

Dividing marker

Ideal for junctions, cusps and other dangerous spots.

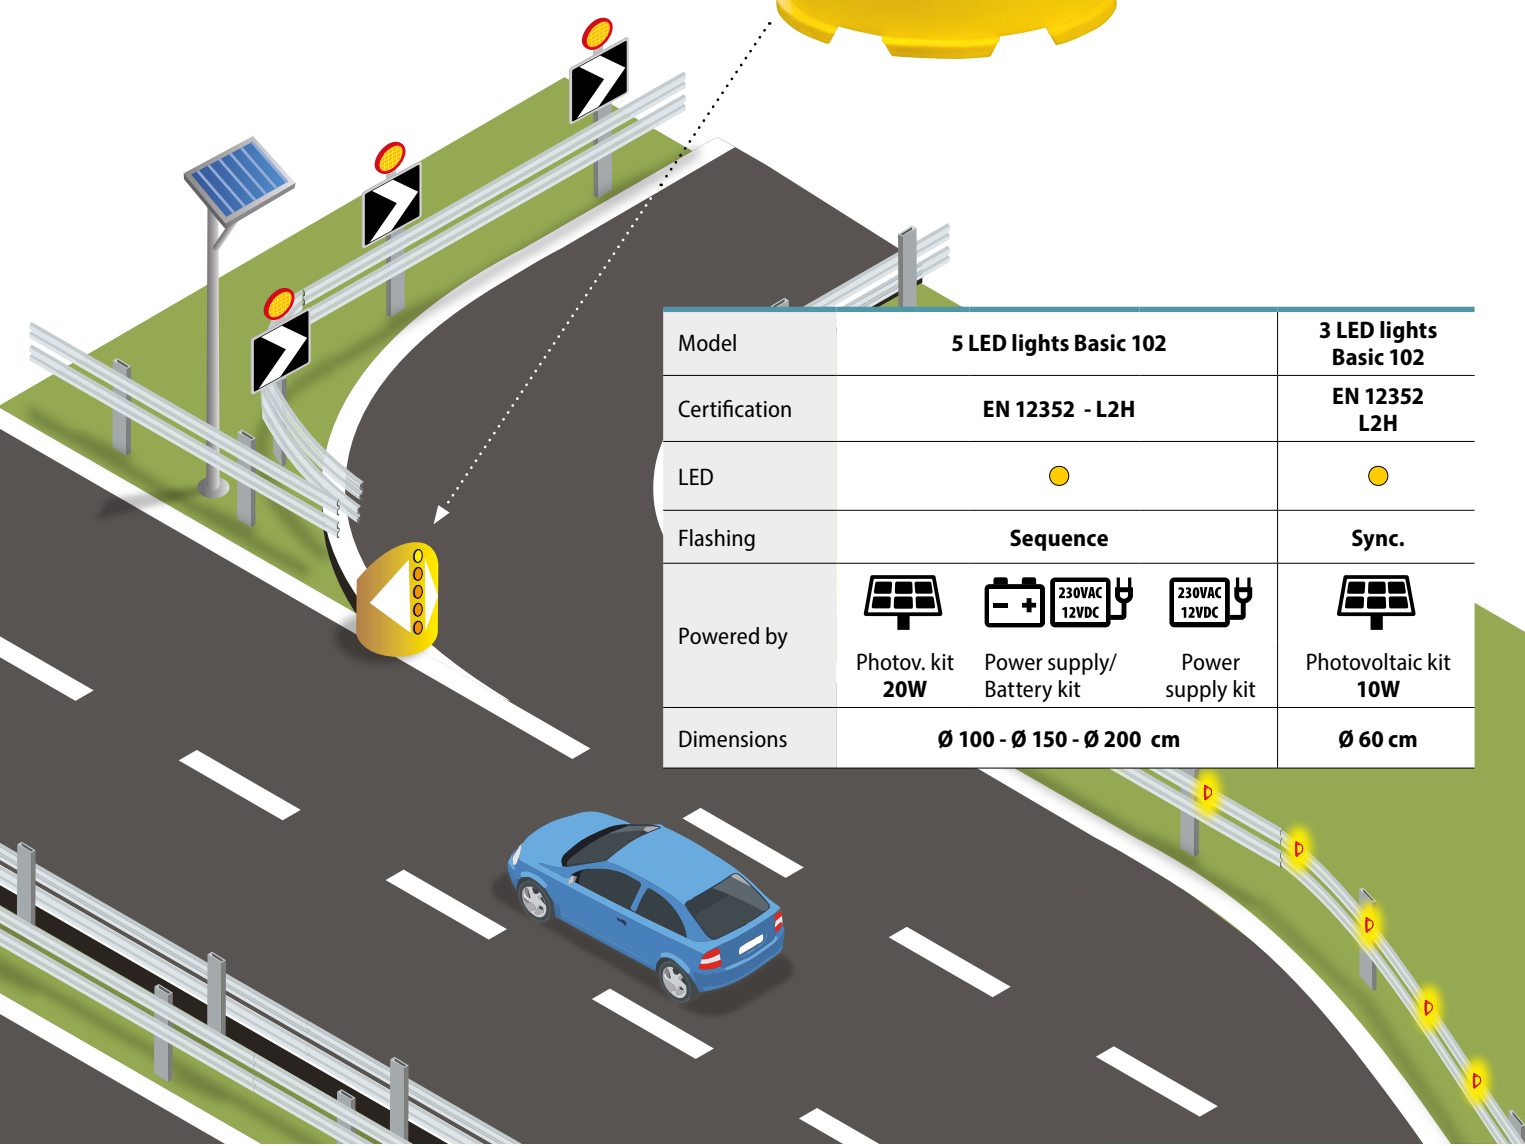

Operating with photovoltaic panel or 230 VAC.

LED Basic 102 sequential.

Arrows in Class 2 film.

Shock resistant.

Various sizes available.

Model	5 LED lights Basic 102	3 LED lights Basic 102
Certification	EN 12352 - L2H	EN 12352 L2H

Dangerous points kit

LED markers powered by a compact photovoltaic kit.

Ideal for dangerous points, roundabouts and fatal edges.

The kit includes:

SIDE 25: LED marker single side amber

Box 303: junction box 2/3 out, TH 392, IP68, with cap.

Compact photovoltaic kit

20W mounting plate- Ø 60.

Ecosolar are powered only by photovoltaic energy.

For solutions powered by the electrical network, see **LED Box** on the next page.

ECOSOLAR 2x BASIC 201

ECOSOLAR BASIC 201

ECOSOLAR BASIC 201

Ecosolar is a line of products with a wide range of **solar powered devices** designed to signalize dangerous situation and integrate the traffic signs.

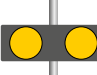

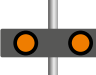

The Ecosolar line uses **LED lights certified to EN 12352**.

The compact design and the **extremely easy installation** make the Ecosolar the perfect choice for any type of pole and traffic signs.

The Ecosolar line is designed to be installed also on existing traffic signals.

Power saving options ensures high autonomy even in critical weather conditions.

To ensure the correct operation of the devices it is however necessary that the photovoltaic panel receives direct sunlight at least during the central part of the day.

LED Box

LED Box is a family of products designed to keep a low impact in aesthetics while delivering a great active safety signal.

They are provided as standard with external control, but there are some models with integrated control unit or with 230 VAC power supply.

The **LED Box** external control can be used with:

- Our Compact Photovoltaic Kit with S600 controller.
- Our Box and control units (see pages 10-11).
- Our DIN rail mountable flashing control unit (see page 32).

Some examples of applications:

D-Solar

D-solar are LED lights with photovoltaic suitable for highways and heavy traffic areas.

They are ideal for cuspidal points, crossroads and fatal edges.

The photovoltaic kit is bigger than the one used for the Ecosolar and that makes them a perfect choice for application with critical weather conditions.

Easy to install and to maintain.

Safety Radar

Safety Radar is very effective device for speed reduction nearby cities, dangerous points, motorway ramps, one-way street etc.

Flashing lights system with doppler radar which detects the car and the speed and sends a signal to the lights if the limit has been exceeded.

Available with LED message panel..

Signage panel not provided.

Animal Guardian 4

Animal Guardian is an innovative device to prevent the fatal street crossing by the wild animals.

It's powered from a high efficiency solar module and it is working during the night emitting both a luminous signal and a constant sound.

The activation is given by the vehicle head lights.

LED colour	● ● ● + beep
Powered by	Photovoltaic panel with auxiliary Li-Pol Battery
Working	☾ Only night
Fixing	Screw
Dimensions	36 x 160 x 70 mm

Animal Uni-Reflector

Tempo Flash

TempoFlash is a safety device that advises the road users about the ice condition of the road surface.

When the outside temperature goes below 3°C the LED flashing double system activates.

The temperature can also be displayed.

Available version with a high precision temperature probe to insert directly into the ground.

The system sends an SMS at a set temperature and can be used in "remote control mode" at any time to obtain information (temperature, system status etc.).

Certification	Basic 201	EN12352 L8H	
LED colour	● LED lights	● Display	
Powered by	 Power supply kit	 Power supply/ Battery kit	 Photovoltaic kit
	Power consumption	13 W max.	+ 6 W display
	Display	740 x 310 x 70 mm	
Digit height	20 cm	Reading distance	100 m

Time Box

Time Box is ideal for schools, companies or others applications where it is important that the signalization it activated only in some hours of the day with a weekly programming.

The system only operates at the scheduled time.

*It's available also the **Time Box Pro** with which is possible, through an antenna, to synchronize different systems with each other for application like **Low Emission Zones**.*

Certification	Basic 201 EN12352 L8H
Time Box consumption	0,5 W (42 mA @12 V)
Time Box Pro consumption	1 W (84 mA @ 12 V)

Time Box application near school building

Time Box Pro application in Low Emission Zone

Wrong Direction Vehicle Detector

This system detects vehicles driving in the wrong direction using induction loops.

Photovoltaic power supply, 12 VDC or 230 VAC.

Control cabinet containing the CPU for managing and storing events, GPS module and control unit for LED flashers.

A wireless connection between the control cabinet and flashers is available.

Features:

- Vehicle detection by inductive-loop traffic detectors
- Sends an SMS or E-mail in case of anomaly, malfunction or low battery.
- the System is equipped with a modem that stores data of the wrong way events
- Different working logics are available together with different types of flashing for Basic 302/201/200 (50%, 10% and triflash).
- **Optional camera to send via E-mail or ftp the images or videos of the events.**

Optional:

Basic 304

Traffic light 0300

Speaker

Camera

Induction loop

Control cabinet

Watch the video:

Vehicle Height Detector

The RAV is a system capable of detecting the height of vehicles in transit with only one sensor installed on the side of the road.

If the sensor detects that the maximum allowed height has been exceeded, the system

Activates a pair of flashers, a siren, a traffic light or a fixed message panel.

The RAV is ideal for underpasses, tunnels, overpasses, or any another application where exceeding the maximum allowed height can be dangerous. It is possible to define the length and width of the area of detection and the minimum size of the object to be detected.

It is possible to have a wireless connection between the control unit and sensor in addition to the standard connection with cables.

The system is powered at 230V

Optional:

Watch the videos:

RAV mobile

Height vehicle detector for road work zone.

RAV Mobile is a system that detects the height of vehicles in transit to protect bridges or overpasses during maintenance operations.

Each module is equipped with fixed or flashing outputs.

Speakers and 360° LED beacons can be connected to a RAV Mobile module in order to promptly alert the workers in the working area.

It is possible to define length and width of the detection area and also the minimum size of the object that has to be detected.

Programmable with IR remote control.

Max. detection area	25 x 25 m		
Module connections	Wireless - max. distance 1 km		
Powered by @ 12 V			
	Power supply	Battery	Photovoltaic kit
	Control unit consumption	2.4 W (200 mA @12 V)	

Underpass Flood Detector

RAS is a modular alarm system designed to warn road users in case of flooding of underpasses.

*The **capacitive technology sensor** is highly reliable and is able to detect flooding and generate an alarm that is transmitted to the control unit.*

The control unit is equipped with fixed or flashing outputs to which can be connected LED warning lights, traffic lights or LED message panel.

*RAS can be integrated with a **4G router** to send an alarm to the competent authorities.*

*The system can be powered at **230V** or with a **photovoltaic kit**.*

Safety system for crosswalks with pedestrian radar and flashing lights.

1. The system starts to work when a pedestrian approaches the crosswalks zone within the sensor area.
2. The LED lights flash on both sides of the road through a wireless communication.

No wiring inside the road.

Easy installation on existing signs.

Energy saving function.

Increased noise immunity.

New flash functions available.

Safety Cross

EyeWitness is a device that can be integrated to the D-Power systems for which the customer needs a "video evidence" or for which he has need of a visual feedback to be able evaluate any alarm or notification.

The system is activated by a contact generated by radar, laser or flooding sensor witch are present in our systems.

Features

Control Unit

- Powered by 18Ah power supply/battery kit
- Modem CPU UMTS
- Discharge blocking circuit
- Surge protection and circuit breaker
- Camera activation with clean contact for connection to all in our systems

Camera

- Mounting bracket for **pole 60 mm, 90 mm or band-it**
- Connection to the control unit via cable with connector

The Blackout system provides an auxiliary power supply integrable in all systems in which is essential to report a power failure.

The power supply is activated directly from the lack of voltage on the line and provides power to the system with the included battery. The battery is automatically recharged from the line as soon as it is restored.

Powered by	Power supply/ Battery kit	230 VAC/12 VDC Battery 18 Ah
Activated by	lack of voltage on the line	
Fixing	band-it - Ø60 - Ø90	
Dimensions	28 x 36 x 11 cm
